

Online Mastery Test Tips

- If you have a student who is not reading much at all yet, forget the Mastery Test and start with the Discrimination and Pre-Reading and Lessons (under the Pre-Tests tab). Then start with Lesson 1.
- If you have a student who has been in the Edmark program before or who reads some words, administer the Mastery Test to know where to place in the program.
- Review the Word Groups Mastered graph on the Summary form. Identify the first word group that is not shown as mastered with a filled in square as a place to begin reteaching.
- Have the student take the Posttest for the last mastered group. Then, for any missed words, select assignments from the word group such as Word Recognition, Picture Match or Phrase Match, and Stories to make sure the student can read those words reliably before going on.
- See the Mastery Test Manual located in Resources for additional information.
